Streamax

2026 TRUCKING ASSET SECURITY SOLUTION

Sentinel

24/7 AOV Camera

Safeguard your assets with confidence — even when the engine is off.

400 mW typical

90-day standby

0.02 lux full colour

THE THREAT

Two ways a parked truck loses money overnight.

Cargo Theft

Rear doors forced at truck stops and unsecured yards. A full trailer can be stripped in minutes.

Fuel Theft

Tanks siphoned quietly in the dark — a few hundred dollars a hit, repeated across the fleet.

THE SCALE OF THE PROBLEM

Up to $35 billion a year — and most of it happens on the truck, not in the warehouse.

Theft of fuel and cargo costs the industry an estimated $17–35 billion annually. Understanding where it happens is the first step to stopping it.

$35B

Annual losses

Upper estimate, fuel + cargo combined

65%

Truck-based theft

Majority occurs via truck modality

26%

Facility theft

Largest single type — theft from facility

7

Top countries

India, USA, Brazil, Mexico, Russia, Germany, South Africa

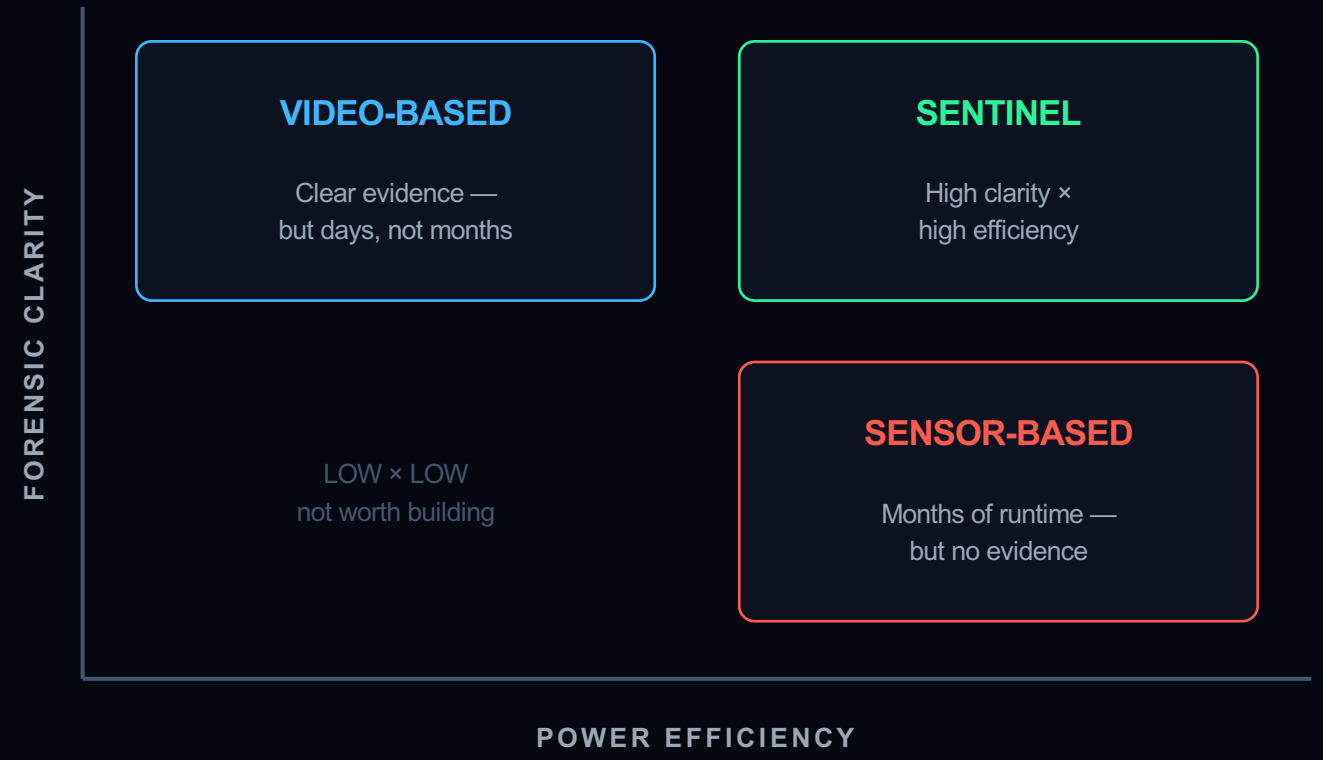

It happens where nobody is watching — overnight, engine off, dashcam asleep.

WHY CURRENT SOLUTIONS FALL SHORT

Clarity or endurance. Until now you had to pick one.

Existing options split into two camps, each with a disqualifying gap. Sentinel is the first camera to sit in the corner nothing else could reach.

The industry needed both. So we built both into one.

THE ANSWER

The industry's first Always-on Video camera.

Purpose-built for parked assets: the forensic clarity of a camera at the power budget of a sensor. Engine off, still watching — for up to 90 days.

- **The power of a sensor**

  ~400 mW while guarding — roughly 1/15 the draw of a traditional camera.

- **The clarity of a camera**

  Full-colour, court-ready footage — even at 0.02 lux.

MEET SENTINEL

One compact unit. Six capabilities.

400 mW

Typical AOV power draw

≈ 1/15 of a traditional camera

90 days

Standby guarding

Engine off, on the truck's own battery

0.02 lux

Full-colour night vision

Black Light Ultra sees where phones see black

12 days

Footage retained on 64 GB

Light-storage encoding — 12× the retention

Always-on Video

Intent-Aware AI

Black Light Ultra

All-in-One Design

IoT Synergies

Minutes to Install

4G · GNSS · Wi-Fi & Bluetooth · onboard storage · I/O with RS-232 — integrated, with a tool-free magnetic mount.

FEATURE 01 · ALWAYS-ON VIDEO

The engine stops. Sentinel doesn't.

Continuous capture, engine on or off — at a remote yard or a highway rest stop. Every second is recorded, so no event goes unrecorded.

- **Always recording**
  Continuous video capture — engine on or off
- **90-day standby**
  Ultra-low-power design sustains months of guarding
- **Forensic evidence**
  High-clarity footage ready for claims and police

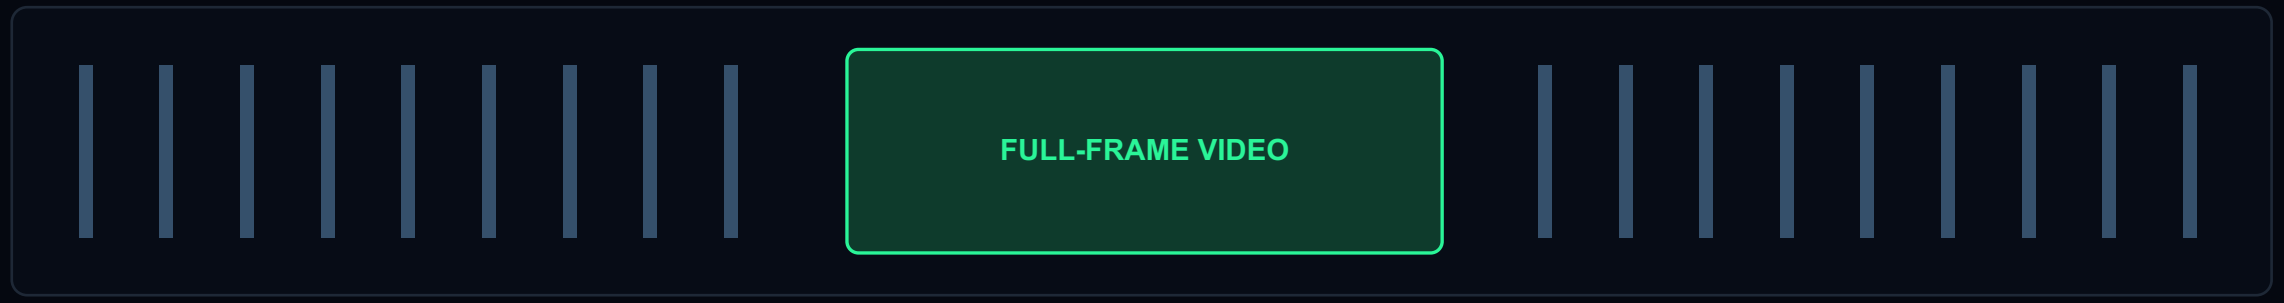

Engine off · guarding · day 47 of 90

Traditional cameras power down when the engine does. Sentinel is the only one still recording when the theft actually happens.

HOW WE ACHIEVE IT

1 frame a second — until someone shows up.

Parked and clear, Sentinel samples the scene one frame per second: a sliver of data that stretches 64 GB across 12 days. The moment a person enters the frame it opens to full-frame video, then drops back when they leave.

400 mW vs 6 W

Power while guarding

Sentinel against a traditional camera

12 days vs 1 day

Footage kept on 64 GB

Light-storage encoding

90 days vs hours

Standby on vehicle battery

Same 80 Ah truck battery

FEATURE 02 · BLACK LIGHT ULTRA

Visible and clear at 0.02 lux.

Black Light Ultra delivers crisp, full-colour footage in near-total darkness — conditions where smartphones and standard cameras capture nothing at all.

Shot on iPhone 15

Total darkness. No evidence.

Black Light camera

Shape returns, detail does not.

Black Light Ultra

Full colour. Faces, plates, actions.

At 0.02 lux, others record darkness. Sentinel records the truth.

FEATURE 03 · INTENT-AWARE AI

It doesn't just see. It understands intent.

Motion alone is noise — animals, headlights, rain, a passer-by. Sentinel reads body posture and behaviour, so it can tell someone walking past your truck from someone working at your fuel tank.

1. **See**
   Captures high-clarity video 24/7, in any light
2. **Interpret**
   Analyses motion, behaviour and scene context in real time
3. **Understand**
   Detects intent and alerts only when the behaviour warrants it

98.67% alert accuracy — tuned over 7 iterations on 9,447 real field samples

FEATURE 04 · IOT SYNERGIES

One camera.
Full asset awareness.

Sentinel is the hub, not just the eyes. It links onboard IoT sensors over Wi-Fi and Bluetooth into one unified alert stream — with video attached to every event.

Fuel level	Main tank 156 L — siphoning detected
Tire pressure	Axle 2-R at 1.9 bar — rapid leak in transit
Temperature & humidity	Cargo at 80 °C — cold chain at risk
Cargo door	Opened off-route at 23:29, outside geofence

Data tells you what. Video shows you who.

FEATURE 05 · INSTALLATION

Mounts where it sees the most.

A magnetic, tool-free mount on the cab roof, facing forward — a clean sightline down the flank and the road ahead. No recorder to wire into the cab, and any driver can reposition it.

Cab-roof

Forward-facing vantage point covering both flanks

Tool-free

Magnetic mount — minutes, not hours, no drilling

Self-powered

Runs on the truck's own battery, no new wiring

Fleet-ready

Reposition or redeploy across the fleet in a day

No separate recorder. No wiring maze. Nothing extra to buy — 4G, GNSS, Wi-Fi & Bluetooth, storage and I/O with RS-232 are all in the one unit.

PROVEN IN THE FIELD

Not a concept. Already earning orders.

Sentinel is still pre-launch — yet 21 customers across five regions are running it on real fleets, and some have already paid for a product that has not shipped.

25 units

In POC today

21 customers · North America, Europe, LatAm, Middle East, Africa

67 units

Firm orders already placed

Africa and the Middle East ordered first — before launch

3,800+

High-potential pipeline

Counted to date, led by Africa and the Middle East

NORTH AMERICA	EUROPE	LATIN AMERICA	MIDDLE EAST	AFRICA
2 · 2 units	3 · 4 units	5 · 5 units	2 · 3 units ★10	9 · 11 units ★57

August 2026: pilots expand to 49 customers / 61 units — with PEMEX, FEMSA, Sigma Foods, Petronas and Petrolimex queuing to test.

THE ECONOMICS

One truck's ledger: $206 a month → $5.

Texas · Kenya — measured on a single truck in their end customer's fleet, and confirmed by the customer.

6 MONTHS BEFORE SENTINEL

26 thefts

929 L stolen · $1,235.60 lost — about 4.33 thefts, 155 L and $206 every month

4 MONTHS AFTER SENTINEL

2 thefts

16 L stolen · $21 lost — about 0.5 thefts, 4 L and $5 every month

↓88%	↓97%	$201	2 mo	603%
theft rate	loss per month	saved / month	payback	annual return

Calculated at a $400 end price: $400 in, $2,412 saved per year. The customer's own fuel-level sensor never caught the 5–6 L siphons.

FROM THE FIELD

Real thefts. Caught on Sentinel.

One quarter of piloting has already caught multiple genuine fuel-theft events for customers across Africa — every frame stamped with time, plate and GPS.

Multiple customers · multiple scenarios — tanker roof, night, depot yards. Evidence, not just an alert.

Streamax

GLOBAL LAUNCH

August 2026.

Product and algorithm have both converged: 312 bugs down to 7, and touch-detection accuracy at commercial standard. Sentinel is ready to ship.

streamax-sentinel.com

Engine off, guardian on.
